Transamerica Tribute®

Underlying portfolios may have existed prior to the inception of the sub-account, therefore, hypothetical performance is calculated as if it was available on the portfolio inception date. Please refer to the illustrations in the prospectus which show the effect on performance of all applicable fees and charges, including the cost of insurance.

The return for each sub-account reflects deductions for the policy's mortality and expense risk charge (currently 0.65% M&E Risk Charge) and investment management fees and fund operating expenses. Policy values depend not only on the investment performance of the underlying funds, but also on the cost of insurance, premium expense charge, surrender charge and monthly deductions, which are not reflected in these rates of returns. Had these costs been reflected, each of the performance figures would be significantly lower. Please refer to the hypothetical illustration contained in the prospectus to understand the affects of all fees and charges, including costs of insurance. Additionally, you may wish to obtain a personalized illustration which reflects all the charges that apply to a policy. Year to date performance is not annualized.

Please note that past performance is no guarantee of future performance. Total return and principal value of a subaccount will fluctuate so that a Policyowner's units, when redeemed, may not be worth more or less than their original cost. This product is no longer available for new sales and no new policies will be issued. Variable insurance products are subject to investment risk, including possible loss of principal amount invested.

£ - The seven-day yield refers to the annualized income generated by an investment in the subaccount over a specified seven-day period. For the effective yield, the income earned by an investment in the subaccount is assumed to be reinvested. The yield calculation does not reflect the deduction of surrender charges. See the Prospectus and Statement of Additional Information for further details regarding calculations of yields.
